

Dear _____,

Washington's legislators have been very supportive of investing in ECEAP, our state's nationally recognized pre-k program.

Right now, more than 28,000 children are eligible but not being served by ECEAP or Head Start. As you make your difficult budget decisions this year, please remember that our children will not be successful in the K-12 system unless they arrive healthy and ready to learn. The 2014 WSIPP study shows ECEAP to be one of the best pre-k programs in the country, with results that last. Please keep our state's future strong by supporting more children in ECEAP.

Sincerely, _____
